

Introducing the VT6-L

The new
entry-level
6-axis robot

EPSON[®]
EXCEED YOUR VISION

VT6-L

Our heritage in small parts assembly and handling, combined with expertise in high-speed, precision robotics has allowed us to design a cost-effective solution that automates simple repetitive tasks, reliably and efficiently.

Do more, spend less

Low total cost of ownership thanks to built-in controller, reliable construction and simple cabling.

Get up and running faster

Easy set up procedures and low maintenance requirements.

Accomplish a wide range of tasks

Simple repetitive tasks can be automated quickly.

Reduce the need for space

A compact, self-contained design, with no separate units.

Save energy and reduce downtime

Intelligent construction, utilising an energy efficient power supply and battery-less motor unit.

Key features

- Small, reliable, competitive and flexible
- Cost-effective technology
- Reach 900 mm
- Payload 6 kg
